Nationality: Indian **Date of birth:** 29/05/2002 **Place of birth:** Bhagalpur, India

Home: P- 157, Near Shitla Mata Mandir, Krishan Vihar, Delhi, 110086 New Delhi (India)

ABOUT ME

Computer Science graduate and Lead Developer with 3+ years of experience in software development, SaaS platforms, and fintech solutions. Skilled in the MERN stack, API development, and building scalable applications for banking and financial services. Passionate about problem-solving, emerging technologies, and continuous learning, with a strong interest in advancing my technical and academic knowledge.

EDUCATION AND TRAINING

Secondary School Examination (Class X)

Central Board of Secondary Education (CBSE) [01/05/2016 – 30/04/2017]

City: New Delhi | **Country:** India

I completed my Secondary School Examination (Class X) under the Central Board of Secondary Education (CBSE), India, in 2017. My curriculum covered Hindi, English, Mathematics, Science, and Social Science, with Information Technology as an additional subject. The programme provided foundational knowledge in language and communication, mathematical reasoning, scientific principles, social studies, and information technology. I achieved a Cumulative Grade Point Average (CGPA) of 6.2 and qualified for admission to higher classes.

Diploma in Computer Science and Engineering

P.M. Polytechnic [01/06/2017 – 31/05/2020]

City: Sonepat | **Country:** India | **Level in EQF:** EQF level 5

Core subjects included Computer Fundamentals and Information Technology, Programming in C, Object-Oriented Programming using Java, Data Structures, Operating Systems, Computer Organization, Digital Electronics, Database Management Systems, Computer Networks, Data Communication, Software Engineering, Web Development using PHP, Python Programming, Cloud Computing and Big Data, Multimedia Applications, and Industrial Training.

Bachelor of Technology in Computer Science and Engineering

PM College of Engineering [01/07/2020 – 01/05/2023]

City: Sonipat | **Country:** India | **Level in EQF:** EQF level 6

The core subjects covered in my Bachelor of Technology in Computer Science and Engineering included Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Computer Organization and Architecture, Software Engineering, Web Technologies, and Design and Analysis of Algorithms. The curriculum also encompassed foundational concepts in computer programming, digital systems, and the theoretical principles underlying computation and software development. These subjects strengthened my understanding of algorithmic problem-solving, computational logic, data organization, system-level operations, and the systematic design, development, testing, and maintenance of software applications.

WORK EXPERIENCE

Proglogix Research & Development Private Limited – New Delhi, India

Intern

[16/11/2022 – 01/05/2023]

- Assisted in reviewing existing source code and understanding application logic, project structure, and development workflows.
- Prepared and maintained technical documentation, including project requirements, application workflows, and code-related details.
- Participated in client meetings to understand business requirements, discuss project updates, and clarify technical needs.
- Collaborated with senior developers and team members to understand project objectives and contribute to development tasks.
- Gained hands-on experience in software development, debugging, testing, and troubleshooting application issues.
- Worked with the team to analyse requirements and understand how they were translated into technical solutions.
- Learned industry-standard coding practices, version control, team collaboration, and software development life cycle (SDLC) processe

Proglogix Research & Development Private Limited – New Delhi, India

Software Developer

[01/06/2023 – 16/09/2024]

- Developed and maintained web applications using modern technologies, including React.js, JavaScript and Node.js.
- Translated business requirements into functional, user-friendly, and responsive software solutions.
- Collaborated with other team members to integrate APIs and deliver project requirements.
- Analzsed existing code, application logic, and system workflows to improve functionality and maintainability.
- Participated in client meetings to gather requirements, discuss project progress, and clarify technical specifications.
- Prepared and maintained technical documentation, including application workflows, implementation details, and project requirements.
- Contributed to debugging, testing, performance optimization, and troubleshooting to ensure reliable application functionality.
- Worked on travel-related features, including booking workflows, search functionality, and the presentation of travel packages and services.
- Worked with version control systems and collaborative development tools to manage code changes and coordinate team activities.
- Followed software development life cycle (SDLC) practices and coding standards to deliver maintainable and scalable applications.

Nextbigbox – New Delhi, India

Lead Developer

[18/09/2024 – Current]

- Led the development and maintenance of web applications using the MERN stack (MongoDB, Express.js, React.js, and Node.js), JavaScript, and modern frontend technologies.
- Designed and developed scalable software platforms for banks and Non-Banking Financial Companies (NBFCs), focusing on digital onboarding, customer verification, and financial technology solutions.
- Contributed to the development of e-KYC systems, video KYC workflows, Aadhaar and PAN verification, digital document management, and electronic signature platforms.
- Translated business and client requirements into technical specifications and reliable software solutions.
- Collaborated with cross-functional teams, coordinated development activities, and supported team members in delivering projects efficiently.
- Participated in client meetings to understand business needs, discuss technical requirements, and provide updates on project progress.
- Worked on API integrations, application architecture, debugging, performance optimization, and code quality improvements.

- Prepared and maintained technical documentation covering application workflows, system functionality, API integrations, and implementation details.
- Developed SaaS applications from the ground up, covering end-to-end software design, development, and implementation.
- Contributed to building secure, maintainable, and scalable applications for financial services and business operations.
- Represented the company at industry events, including the Bengaluru Tech Summit and AI-focused technology summits, gaining exposure to emerging technologies, industry developments, and innovative software solutions.

SKILLS

Programming languages

JavaScript (ES6+) / TypeScript / JAVA / Python

Frameworks and libraries

React.js / Next.js / Express.js / Node.js / Redux Toolkit / Tailwind / Bootstrap

Databases and backend

SQL / MongoDB / PostgreSQL / Firebase / REST/SOAP API Integration API / API Development

Professional skills

Team Leadership / Client Communication / Problem-Solving / Requirements Analysis / Project Coordination

Tools

GIT / GITHUB / SQLyog / Apidog / Swagger / Postman

LANGUAGE SKILLS

Other language(s):

English

LISTENING C1 **READING** C1 **WRITING** B2

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user
